

Features:

- Mates to Shark Series Illuminators
- +/- 30° Full Beam Angle
- Assists in coupling to secondary optics
- Possible MR11 / MR16 Replacement
- Scratch resistant reflective coating

Product Description:

The 12PL-0011 CPC (Compound Parabolic Concentrator) is a Reflector Optic that mates onto the Shark Series High Flux Illuminators. This CPC focuses the light emitted from the Shark Illuminator into a concentrated beam for applications requiring a very bright directional light source. May be used as a possible replacement for MR11 and MR16 style lamps when used with a Shark Illuminator.

Opto Technology can customize reflectors or lensing optics, in order to provide total lighting solutions. Please consult the factory for additional information.
